Weight Sorting - Count Sorting - Low Labor*

**The 'Gentlest Handling' tomato
sorter on the market today**

Gentle Handling - The essence of the Compac SLS Tomato Repack sorter

Mature Greens - Romas - Vine Ripes

When only the best will do !

Overview

The Compac SLS (Single Lane Sorter) is ideal for increasing returns and efficiency to tomato repackers. Accuracy and consistency of size and grade are greatly improved and many customers report substantial labor savings. It's reliable, built to last for years and can be installed with place packing and/or volume filling systems. It also has the ability to use baggers providing additional returns and flexibility.

Compac's latest technology ensures you're never left behind in the race to achieve high returns for your valuable fruit and it's so easy to learn and use! It's versatility of design accommodates for space limitations in the packhouse by using a unique 'Double Side Tipping' Compac carrier to pack from one side or both sides of the machine.

Many components are manufactured from stainless steel to meet sanitation requirements and extensions can be made at a later date to accommodate extra sizes and color grades.

Features

- * HIGH SPEED - Up to 12 fruit/second
- * HIGH ACCURACY - Weighs to better than 1 gram (0.03528 ozs) per fruit
- * HIGH THROUGHPUT - Output in excess of 500 x 25lb boxes/Hr achieved
- * GENTLE HANDLING - With NO cross conveyors fruit drops are minimal
- * VERSATILITY - Can sort Romas, Vine Ripes, Mature Greens and other fruits
- * ACCURATE COLOR SORTING - InVision 5000 system
- * PRECISION WEIGHING - Computer weighs fruit delivered to each outlet
- * FULL LABELLING CONTROL - Interfaces to proprietary brand auto labellers
- * CARTON MANAGEMENT - Can be installed with full and empty box systems

Sorting Table

Compac also offers a stainless steel sorting table for dumping, washing/rinsing, manual sorting, drying and 2nds removal. This combination with the SLS sorter makes for a practical turnkey solution.
